Roundtable Opportunity: Biomarker Testing in early-stage NSCLC and Digital/Computational Pathology

Virtual session sponsored by AstraZeneca

Tuesday, April 22nd

11:00 am to 12:45 pm (central)

Interest regarding the CAP Foundation hosting of industry sponsored Pathologist's Perspective Roundtables (PPR) continues as these roundtable initiatives are designed to identify where current practice is today and help benchmark for the future. The goal is to foster open discussion and collaboration between industry experts and pathologists on topics that directly impact patient care.

Roundtable objectives for this session includes:

- knowledge sharing to enhance the precision and effectiveness of biomarker testing in diagnosing early-stage NSCLC and computational pathology across the stages.
- gather insights into current challenges and opportunities related to biomarker testing and digital pathology.
- understand how recent advancements can be integrated into clinical practice to enhance diagnostic workflows.

Desired Expertise

- lung cancer biomarker testing
- digital/computational/AI

Practice Setting: community or academic

Why participate? Pathologists from across the US bring together multiple viewpoints to share ideas, ongoing challenges, and their unique perspectives to advance the specialty and improve patient care.

- Participation is by invitation only and is limited to eight to ten pathologists with a keen interest/expertise in the roundtable subject matter.
- The CAP Foundation does not pay any physician for their participation in Roundtables.
- Physicians who participate volunteer their time to the Foundation and to the discussion in support of the CAP Foundation mission, any non-Disclosure agreements are made between the pathologists and industry partner.
- Pathologists participating in any roundtable session represent their opinion and are not serving as a representative of the CAP or CAP Foundation.
- Funds contributed to an education webinar or roundtable go to the CAP Foundation in support of its mission

Contact CAP Foundation staff, Julia Rankenburg, jranken@cap.org to learn more and sign-up.
